Job Title: AI Developer

We are looking for a skilled and motivated **AI Developer** with hands-on experience in modern AI technologies and full-stack development. The ideal candidate should have strong knowledge of **LLMs, Generative AI, and backend frameworks**, along with the ability to build scalable AI-powered applications.

Key Responsibilities:

- **Develop and deploy AI applications using LLMs and Generative AI**
- **Build and integrate APIs using FastAPI**
- **Create dashboards and apps using Streamlit**
- **Develop AI agents/workflows using LangChain and LangGraph**
- **Implement RAG-based intelligent systems**
- **Integrate MCP for advanced AI interactions**
- **Monitor and optimize applications using LangSmith**
- **Work on full-stack development using MERN stack**

Required Skills:

- Experience with **FastAPI, Streamlit**
- Working knowledge of **LangChain, LangGraph, LangSmith, LLM & Generative AI.**
- Understanding of **RAG architecture**
- Experience with **MERN Stack (MongoDB, Express.js, React.js, Node.js)**
- Knowledge of REST APIs & also familiar with **Git and version control systems**
- Ability to learn and adapt quickly
